

TigerStop

TigerStop® is an automated material pusher and stop that will turn your existing machine into a lean manufacturing asset. Take your operations to a whole new level with the product that started it all.

TigerStop®
fast and accurate...every time

Fast and Accurate Automation for Any Sized Shop

Add a TigerStop on to your new or existing machine tool. Type in your desired measurement, place your material, and press start. Say goodbye to your tape measure. It's that simple.

Zero Set Up Time

Do away with "measure twice, cut once". Eliminate tape measures, manual stop blocks, and clamps from your manufacturing process.

100% Accuracy

The parts you cut today will be as accurate as the parts you cut next week, next month, and next year. Over 40,000 customers have trusted TigerStop's repeatability since 1994.

No More Rework

Quality control starts with TigerStop.

Increased Productivity

Keep your operators in the money making zone: cycling your saw, drill, or punch.

Easy to Operate

An unskilled operator can be trained to use a TigerStop to push, pull, and position material in under 10 minutes.

Improved Yields

Raw material costs are rising. Using a TigerStop, especially one with Dynamic Optimization™ software, maximizes yields. That's profit added to your bottom line.

THERE ARE OVER **783,820,800** WAYS TO **CONFIGURE** A TIGERSTOP.
BUT IT'S REALLY ONLY **4 STEPS**.

Build your very own by visiting:
www.configurator.tigerstop.com

Choose Your Tools.

TigerStops can adapt to virtually any machine tool.

Choose Your Tables.

- Solid
- Steel Roller
- Plastic Roller

Choose Your Software.

- Backboard Optimization™
- Dynamic Optimization™
- Dynamic Pack Optimization™
- Flooring Optimization™
- TigerSet
- TigerStopSDK Open Source Software Development Kit

Choose Your Accessories.

- Label Printing
- Bar Code Scanning
- Table Accessories
- Various Pushers
- Standard Interconnect Kit
- Advanced Interconnect Kit
